our MISSION
IS TO MAKE OUR FOOD SYSTEM
AND AGRICULTURE BIOLOGICALLY
SOUND AND SOCIALY EQUITABLE
Female farmers are changing the face of farming—and some of them are doing it without a partner by their side. This panel offers an opportunity to dig deeper into the stories of some of these farms and their fearless female farmers. Be prepared to be inspired by their gusto!
Megan Denton, Able Farms: www.ablefarms.org

Farmer, Chef, Owner, Operator

Able Farms was founded on Sauvie Island in 2011 by Megan Denton, Jenny Herget, and Dan Cadmus. Since 2012, Megan has been the main force of Able Farms. A one woman ran operation that is over 3 acres of livestock, vegetable, and fruit production grown with the goal of sustainability and a vision of having the foods that feed our community originate from self-sustaining agricultural systems. Ethics of sustainability, food justice, humane treatment of animals, and community mutual reliance defines Able Farms. "We are strong, We are passionate, We are Able "

Farmer, Owner, Operator

Flying Coyote Farm is a small and vibrant farm located 40 minutes outside of Portland in Sandy, Oregon. We are passionate about growing the highest quality food using both biodynamic and organic growing practices. We distribute our vegetables, herbs, eggs, raw dairy, and pasture-raised meat to our CSA Program, Farmers Markets, and local restaurants. For us growing food is an essential and radical act that leads to healthier communities, land, and people. Come eat at our table and taste the difference!

Sweet Honey Farmacy: Homegrown Foods and Handcrafted Remedies.

Laura Masterson, 47th Avenue Farm: www.47thAveFarm.com

Farmer, Owner, Operator

All of our farm properties are managed sustainably using cover crops between vegetable rotations, beneficial insects, drip irrigation and conservation tillage techniques. This holistic farming system improves the tilth and fertility of the farmland. It also protects the woods, wetlands and communities that surround our farms. And it simply makes better vegetables.

So very many other affiliations to list…
